

Exploration Archives 4.3

New Features

2.0 New Features:

The following are the main features added to 4.3 by module:

2.1 Related Records

2.1.1 New Tabs - Contract Associates and Locations

New grandchild tabs have been added to display the business associates and geographic locations associated with the selected contract in Related Records.

The grandchild tabs have been added in the following locations:

- Child Contracts in Contract Module
- Parent Contracts in Contract Module
- Contracts in File Module
- Contracts in Catalog Module
- Contracts in Seismic Module
- Contracts in License Module
- Contracts in Project Tracker Module
- Contracts in Media module

2.2 Contracts module

The Contracts module has new tools to allow you more flexibility while working with contracts.

NOTE: in 4.3 Contracts are now separate from Files.

- Assign Or Add A Business Associate
- Assigning A Parent Or Child Contract
- Link or Unlink a File
- You can attach Terms and Conditions to a contract while it is being created, or to an existing contract from the related records tab.
- Update Contract Files
- Update Contract File Location
- A New Delete Contract tool has been added and is accessible from the main toolbar or context menu.

2.3 Catalog Module

- A new setting has been added in the Catalog General Settings module to remove the filter of business associates that appear in the Catalog Editor.
- An Import Parent-Child Links tool has been added in the File and Catalog Editor modules and can be accessible from the context menu on a files grid.

2.4 File Module

- A new "Create directory listing" checkbox has been added to the File Batch Move/Copy tool that enables the creation of a directory listing file.
- There is now a new column summary for the **File Size KB** column that will calculate the **Total File size** in **GB**.
- You can now link or unlink Contracts or files from the files screen

2.5 Seismic Module

- Two new tools have been created to **link/unlink** seismic transaction and contracts for the seismic screen.

2.6 Project Tracker Module

- Multiple projects can now be linked to multiple contracts.
